

G Suite

Enterprise Grade Backup 50% Faster 100% Secure

KEY CAPABILITIES

- Automated and on-demand backups
- Quick and easy data restore and recover with granular search options, including historical snapshots
- Advanced administrative tools and control
- Complete data and status monitoring
- Internationally recognized compliance and security

KEY BENEFITS

- Minimizes the risk of data loss in the cloud
- Assures 100% safe and reliable access to your data
- Meets audit requirements for backup and recovery with flexibility to select backup times and choice of AWS datacenter locations in the US, Canada, EU, or Australia
- Easy to use with simple, intuitive, non-technical interface to easily activate backups, restore, or export data
- Simple activation of backups to offload IT work by empowering any user to easily protect content and restore lost data

CloudAlly's cloud-to-cloud backup solution for gmail, drive, calendars, contacts, and sites provides a simple, automated, and secure backup of all your critical business data.

Balance Data Control and Work Productivity

So, your company has switched to G Suite in pursuit of better collaboration capabilities, increased productivity, and less IT maintenance. That doesn't mean your data is secure. While collaboration and productivity are important, it's your data that needs to be protected to ensure business continuity and to meet compliance demands.

When your data resides outside your organization's boundaries and outside the control of your IT staff, it's a complicated situation. While Google offers minimal data protection and recovery, ultimately you're still responsible for all of your information. You need to ensure you are protecting your critical data from loss due to accidental deletion, sync errors, malicious insiders, or hacking.

Business best practice guidelines require automated backup and recovery for your data, which G Suite doesn't provide. When data is deleted from Google, it is deleted forever, and you could lose access to your intellectual property and waste thousands of man-hours and dollars recovering data that should never have been lost in the first place.

That's where CloudAlly's cloud-to-cloud backup for G Suite can help.

CloudAlly offers the most reliable and trusted SaaS application data backup and recovery solution for your IT team. It enables automated daily and on-demand backups, using Amazon S3 secure storage, to ensure that your G Suite data—including Gmail, Drive, Classic Sites, Calendars, Contacts and Tasks—are safely stored and easily recoverable. And it's effortless.

Administrators can perform a non-destructive restore or export of your data with a single click—reducing the risks of lost productivity and meeting even the fastest RTOs. ick,

With CloudAlly cloud-to-cloud backup for G Suite, you have full administrative control of your G Suite data. And don't worry about running out of storage space; customers receive unlimited storage and archive retention, so you can be confident that your data can be recovered from any point in time.

Automated and On-demand Backups

CloudAlly performs automated daily backups – using Amazon S3 secure storage – of all G Suite data.

- **Metadata Backups:** Backup and restore your data to its full, original state. Keep your document directory structure, nested folders, site structure, metadata, sharing permissions, and more.
- **Pause Backups:** CloudAlly's pause function allows you to archive backups when off-boarding employees, keeping the data available for export or restore to another user, even after you remove the Google license.
- **Single Repository Backups:** Store your G Suite data in a single repository alongside all your other corporate information including Office 365 Exchange, SharePoint and OneDrive, as well as Box and Salesforce.

Fast and Safe Restore

CloudAlly allows you to quickly and restore lost data with advanced search and recovery capabilities through CloudAlly.

- **Point-in-time Restores:** Access historical snapshots or versions of all G Suite data—documents, folders, sites, calendars, contact groups—and restore to any previous known state with 100% accuracy.

- **Search and Filter:** Use our powerful granular search to quickly locate and recover individual items.
- **Quick Data Navigation:** Browse backups by date snapshot—in chronological sequence—and then drill down through the snapshot to restore or export data at any hierarchical level (mailbox, folder, or individual item).
- **Non-Destructive Restore:** With a single click, perform a non-destructive restore of data to the same user or to a different user if specified in the target field.
- **Archived Export:** Easily export archived data for local access in zip format, or directly to your own S3, Azure, Box or Dropbox storage. The exported data is in the original formats such as docx, ppt, pdf, etc.

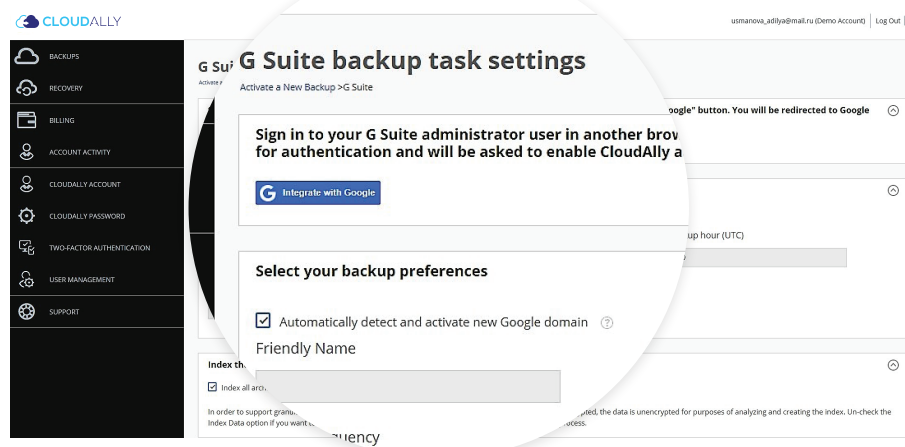

Advanced Usability

CloudAlly allows G Suite administrators to customize their cloud-to-cloud backup settings, so you are always in control of your domain.

- **Manage Users:** Manually add, delete, and manage your users and their data backup preferences.
- **Credential Storage:** Using OAuth for provisioning your backups eliminates the need to store your credentials.
- **Auto-Detect Users:** CloudAlly automatically detects new users and can add new team members to the system to ensure data is backed up from day one on the job.
- **Manage Domains:** Manage multiple domains from a single CloudAlly account.
- **Datacenter Location:** Choose where to store your backups in AWS datacenters in the US, Canada, EU, or Australia, for compliance with local data privacy requirements.
- **All Bases Covered:** CloudAlly's backup is compatible with all G Suite / Google App plans.

Data Monitoring

CloudAlly's G Suite backup service automatically provides administrators with a daily backup email summary. Plus the activity screen shows a full list of all activity within the backup, so that administrators always have full knowledge of their domain.

- **Activity Log:** All activities including login, backups, restores, etc., are logged and available on your CloudAlly account activity screen.
- **Daily Backup Summary:** You can receive an optional daily backup email summary including a .csv attachment with details of each backup task.

Compliance and Security You Can Trust

Trust and transparency are critical to your cloud-to-cloud backup service. We know how critical data protection is to your business, so we've made it our top priority to provide a trustworthy product and service that is reliable, accurate, and transparent. Giving you meaningful insight into your data. Everything we do is focused on giving you piece of mind.

CloudAlly's G Suite backup is certified, and fully compliant, with internationally recognized accreditation for information security.

- Unlimited storage and unlimited retention of daily backups.
- Non-destructive restores to protect your live data.
- Optional auto-detect and backup of new sites for easy on-boarding.
- Secure Amazon S3 storage with AES-256 bit encryption.
- Client selected backup location in AWS US, Canada, EU, or Australia data-centers.

- ISO 27001 certified, GDPR and HIPAA compliant.
- Two-Factor Authentication.
- 99.9% Uptime / Availability SLA.

Founded in 2011 as one of the world's first cloud-to-cloud backup services for G Suite and Google Apps

and Salesforce, CloudAlly led the industry with the first commercially available Microsoft Office 365 cloud backup in 2014. ISO 27001 certified, GDPR and HIPAA compliant, CloudAlly adheres to industry standard best practices for information security management. CloudAlly is privately held and has customers and partners in over 40 countries.
