

CloudAlly Expands Into Canada With New Cloud Data Centers

CloudAlly announces a new AWS data center in Canada, allowing for compliance with the Canadian Privacy Act and PIPEDA.

Raanana, Israel (PR Newswire) – 15 July 2018 – CloudAlly, (www.CloudAlly.com), a leading international provider of cloud backup solutions for [Office 365](#), [G-Suite](#) and [Salesforce](#), announced today its support for cloud backup to Amazon AWS data centers in Canada. Channel partners & customers in Canada can now use CloudAlly to protect leading SaaS applications while ensuring that all data remains within Canadian borders.

“Our Canadian customers and partners are eager to take advantage of our backup solution on local data centers in Canada,” said CloudAlly CEO Avi Katz. “CloudAlly is extending its reach with the availability of the AWS Canadian data center. We can now ensure data sovereignty as required by the Canadian Privacy Act and PIPEDA across all provinces and industries.”

In addition to the new AWS Canadian data center, CloudAlly also offers customers the ability to select data centers in the US, EU and Australia.
